# COMPANY OVERVIEW

## OUR AREA OF EXPERTISE

Our company focuses very strongly on 2 core strengths:

Our ability to adapt quickly to the growing number of demands for more economical solutions without compromising on quality

Customer service – We pride ourselves on our relationships with customers. Our motto is to never lose a customer and so far our record is something we are very proud of.

## PHILOSOPHY

*Highrock Technologies is a value-based firm that works within a common belief system. This belief system allows Highrock Technologies to work inter and intra dependently with very little supervision and no micromanagement, enabling true breakthrough results. With a common belief system and total commitment, the impossible becomes possible.*

*At the foundation of the Highrock Technologies belief system is a very clear set of guiding principles, we call them our Pillars of Strength. These principles form a set of core values that are religiously preserved as they form a rock-solid foundation that does not drift with trends and fashions of the day.*

## Hardware Repairs & Servicing

We have an experienced team of qualified technicians available to address any hardware, software or networking problems you may have. With a fast turnaround time, we minimize downtime, hence ensuring minimal impact on your organizations productivity.

## Internet Connection Management

If you need a system to manage and monitor your internet connection, we can install and configure one for you. This system will allow you to distribute and monitor internet access in your office, block access to harmful or restricted websites, and even specify the hours during which internet access would be available to users.

## Email

We can set up a secure email system for your office, with email accounts for every employee. Training can also be provided to acquaint staff with email features such as the set up email signatures and automatic out-of-office replies.

## Networked printing

All your office printers can be made available from your network so employees can print from their own machines.

# SERVICES & SUPPORT OFFERED

## ENHANCED SECURITY

One of our top priorities is the safety of your data. We will make sure that your I.C.T. system has the best protection available from viruses, hacking and other unwelcome intrusions. With the latest anti-virus and anti-spyware software and industry-standard firewalls we ensure a safe and secure working environment.

Kaspersky Antivirus

Firewall

Eset Antivirus

BitDefender Antivirus

## DATA BACKUP

Another concern for Organizations today is the loss of data either from user error or from hardware failure. We offer a number of robust and reliable backup solutions to ensure that your ICT system is not crippled by data loss.

## POINT OF SALE SYSTEM

A **Point of Sale System** includes everything you'll need to get started with POS in your business. Depending on your needs and the type of business you have, we have systems specifically designed for retail, restaurant, hospitals, and iPad based applications. Each system is made to provide the most efficient and productive POS experience for you and your customers.

## SERVICES & SUPPORT CONT'D

### INTRUDER DETECTION SYSTEMS

Our Intruder systems range from intruder alarms, control panels and motion sensors through to fully integrated intrusion and door control security installations. They include environmental protection and life safety devices, and perimeter protection products including glass break, seismic and shock sensors.

Some of our systems have a modular design and different communications options, so you can tailor them to your needs. You can choose from wired, wireless or hybrid solutions.

### CCTV SOLUTIONS

#### IP SOLUTIONS

In today's fast moving world of technology it's important that the correct technology is applied in all areas of business and CCTV is no exception. Many variants of IP Based solutions are available on the market today so it is critical for you that your integrator provides the correct advice.

Using Digital Video Recorders for CCTV Systems is still a very reliable, stable and most importantly cost effective method of achieving your surveillance goals especially in small to medium businesses.

## MAINTENANCE

CCTV Solutions recommends that once your system is installed a regular maintenance program be entered into;

### SERVICE CONTRACTS

Available with all solutions provided by Highrock Technologies is a contract streamlined and designed according to your specific needs in order that we may serve you to the best of our ability. Through this contract we provide regular maintenance and support for your individual company needs.

The scope of the contract is flexible and hence can be customized to cover your technical needs at a reasonable rate.

### QUALITY ASSURED

We at Highrock Technologies share a passion for satisfying customers, an intense focus on teamwork, speed and agility, and a commitment to trust and respect for all individuals.

In order to earn respect and loyalty, we must provide products, services and solutions of the highest quality whilst delivering more value to our customers.

In terms of quality, Highrock Technologies offers quality products at an economical price with the after sales service, warranty and support that you would expect from a professional outfit.
